PROFESSIONAL PROFILE

IT systems professional with experience in Windows and Linux servers, networking, virtualisation, Microsoft 365, hardware, storage, backup and user support. I combine infrastructure administration with scripting, automation and software development, enabling me to troubleshoot incidents and deliver complete, maintainable technical solutions.

CORE SKILLS

Systems: Windows Server, Linux, virtual machines, services, permissions and maintenance

Networking: Switches, firewalls, racks, patch panels, Ethernet, DNS, VPN and connectivity

Workplace and identity: Microsoft 365, Entra ID, Google Workspace, level 2 support and documentation

Infrastructure: Servers, NAS, storage, hardware, compatibility, backup and recovery

Automation: Docker, Git, Bash/scripting, n8n, Java/Spring Boot

PROFESSIONAL EXPERIENCE

NATTIA - Software Developer & IT Systems Administrator

Nov 2025 - Present | Las Rozas, Madrid

- Administer and maintain Windows/Linux servers, virtual machines, networks, DNS, VPNs, Microsoft 365, Entra ID and Google Workspace.
- Install racks and servers, configure switches and firewalls, manage storage, replace components and maintain user equipment.
- Analyse requirements and hardware compatibility, size technical solutions and support users and clients.
- Participate in service and database migrations, legacy system reviews and identification of insecure configurations.
- Design and apply backup, data verification and disaster recovery procedures.
- Automate operations with scripting, n8n and Docker, supported by Java/Spring Boot development skills.

LIT - Management Platform for a Professional Services Firm - Software Developer | Application & Infrastructure

May 2026 - Present | Madrid, Spain

- Analysed, sized and deployed the complete infrastructure supporting the platform.
- Evaluated component compatibility, server hardware, rack, networking, storage, NAS, backup, firewall, antivirus and recovery requirements.
- Administer Linux, Docker, corporate email and the services required for a Java application and local AI workloads.
- Designed operational security, access control, auditing, traceability and continuity measures.

ALTEN Spain - Telecommunications Technician

Apr 2023 - Jun 2023 | Project in Germany

- Supported LTE network maintenance and upgrade work in collaboration with Huawei.
- Assisted with system configuration, incident documentation and Kanban-based task tracking.

McDonald's - Customer Experience Lead

Nov 2021 - Jan 2025 | Torrelodones, Madrid

- Resolved incidents, trained new team members and supported small-team coordination in high-pressure operations.

SELECTED PROJECTS

Professional portfolio - alejandropereellon.es | alejandropereellon.es

Deployed and maintain a bilingual static website on self-managed Linux infrastructure using NGINX, Apache, Git, technical SEO, security controls and a PHP contact endpoint.

Technologies: Linux, NGINX, Apache, PHP, Git, Astro, Tailwind CSS

Paola Glam Art | paolaglamart.es

Developed, secured and maintain a professional website on low-consumption infrastructure with automation, editorial management and technical SEO.

Technologies: PHP, Linux, Apache/NGINX, n8n, web security
